

SCS Formulate 2025

HARKE

UK & Ireland

Rheology *playground*

Colours that pop, innovative textures, and fragrances that spark emotion. Our ingredients are ready to make your next formulation unforgettable...

SEE *Love how it looks*

TOUCH *Formulation feel matters*

Featured Ingredients

From pearlescence to bold colours and suspended beads, we can help you bring visual excitement and 'shareability' to your next formulation.

Biodegradable Beads
Colours & Dyes
Opacifiers
Pearlisers
Suspending Agents

COSMOSPHERES®

Omya

Biodegradable solid beads made from microcrystalline cellulose, ideal for hygiene and skincare products like sanitisers, shower gels, lotions, and foundations. They enhance consumer experience with attractive claim visualisation and can be customised with active ingredients (e.g., Vitamin A, E) or colour pigments. Also available in a vegan-friendly version.

PEARLISERS

Verdant

Mackpearl® liquid pearlisers are perfect for formulators looking to add a luxurious, shimmering effect to their products with minimal environmental impact. They are cold-processable, biodegradable, and ready to use at room temperature. Just 1-8% addition to formulas provides an immediate pearlisng/opacifying effect. Available in sulfate and sulfate-free blends.

OPACIFIERS

Syensqo

Syensqo's next generation opacifiers are readily biodegradable and microplastic-free, delivering a creamy white and caring appearance to formulations. Easy to use and suitable for almost all formulations, including sulfate-free formulations and with cationic ingredients, without the need of a rheological agent. The ideal alternative to synthetic acrylate-based opacifiers.

ADDPOLS

HARKE UK & Ireland

Polymeric non-staining colourants that deliver vibrant, stable colour across laundry, household, and industrial cleaners. Supplied as easy-to-use liquids, fully water soluble, and can be used in liquid and solid formulations across a wide pH range. Addpols allow for high-strength colour in concentrated products like car foams while minimising staining.

NATURAL FOOD COLOURS

HARKE UK & Ireland

These D&C-approved colourants add rich, pearlescent effects that enhance visual appeal and create a shimmering, creamy look. Easily dispersible in cold process formulations, simplifying the manufacturing process. Ideal for various rinse-off products, expanding formulation possibilities.

SHIELD OIL™ SHIKONIN

LABIO

A fermented plant oil with antioxidant and skin-protective benefits, derived from Lithospermum erythrorhizon root extract and sunflower seed oil. Shields against environmental damages, soothes sensitive and acne-prone skin, calms irritation and redness, and strengthens the skin barrier. Also adds an attractive pink hue to formulations, adjustable by content.

From jelly cleansers and sorbet moisturisers to lightweight oils and nourishing butters, we can help you create the right texture for every formulation.

Emollients
Emulsifiers
Oils & Butters
Rheology Modifiers

Featured Ingredients

EMULSIFIERS

Sinerga

Sinerga's green emulsifiers are 100% vegetable-origin, sustainable, and skin-friendly. Their liquid crystal network improves adhesion and enhances formulation efficacy, creating smoother, more comfortable textures across skincare. Free from silicones, sulphates, and parabens, Sinerga emulsifiers respect the skin and the environment as well as elevating sensory appeal.

FERMENTOILS

LABIO

LABIO's advanced Fermentoil series is designed for superior texture and effectiveness in cosmetic formulations. Their fermentation process enhances the free fatty acid content, critical for skin health, while improving emulsion stability and offering a light, non-greasy feel, all within a 100% natural, COSMOS-compliant oil.

OLEOLOGY™ LDXP / HDXP / HDXP KL

Syensqo

A line of natural oil rheology modifiers that enhance the texture, stability, and performance of oil-based products and emulsions in skin, body, hair, and colour cosmetics. They provide excellent stability, create unique textures, add shine, and can form transparent to translucent gels with various viscosities.

OILRICH® SQ OILS

W. Ulrich

Oilrich® SQ oils are a new, novel range of oils which have been physically altered in a natural, patented process to change the texture of the oils, making them feel lighter compared to their traditional counterparts. They enhance sensory qualities like texture and feel, integrate smoothly into formulations and have reliable year-round availability.

SMELL *Scent completes the story*

Whether it's a soothing botanical, a playful flavour, or a fragrance that lasts, we help you build scents that spark emotion and turn routine into ritual.

Featured Ingredients

FRAGRANCES

Carrubba

The right scent can make all the difference. Carrubba's vast array of natural and synthetic fragrances open up a world of possibilities, allowing you to craft unique scents across hair care, skin care and baby care. From buttered pecan waffles to orange blossom and rain water, there are endless fragrance options to bring to your next formulation. Allergen-free range available.

FLAVOURS

Carrubba

Carrubba's flavourists create distinctive taste, smell and texture profiles that enhance the sensory appeal of lip balms and oral care products. They offer both traditional and innovative flavours, creating memorable experiences through playful and trending options such as cookie dough, lemon liqueur, salted caramel and bubble gum. Artificial and natural flavours available.

DEOPLEX® CLEAR

Carrubba

A naturally derived odour neutraliser created through fermentation between yeast and sugar cane. DeoPlex® is a water-soluble clear liquid that works to break down malodours through various methods in many different formulation types such as deodorants, cooks hand washes, feminine hygiene products and baby care formulations. Also available in an organic grade.

FLEXISORB™ RANGE

ICT

If you're formulating for HI&I, neutralise smells naturally and effectively with Flexisorb™, a range of odour absorbers made from zinc ricinoleate that trap and neutralise odours rather than masking them. Ideal for various applications, from air fresheners and fabric sprays to carpet and upholstery cleaners.
